## 670HS Karna-Sil™ Ultra

### Silicone Roof Coating

**Don't Re-Roof...Restore, with 670HS Karna-Sil™ Ultra.**

### 670HS Karna-Sil™ Ultra High Solids Silicone Coating

**STOP ROOF LEAKS FOR GOOD!  
Save money, time and gain peace  
of mind.**

Avoid time consuming and costly roof tear offs with 670HS Karna-Sil Ultra Silicone Coating. Prevent premature aging and extend the life of your roof.

When applied to existing roofs, 670HS Karna-Sil Ultra Silicone coating creates a durable, seamless, water-resistant membrane that seals and protects against ponding water, damaging ultraviolet light and severe weather conditions.

### 670HS Karna-Sil Ultra Delivers These Advantages

- Resists ponding water
- 100% solvent free, environmentally safe
- Designed for potable rainwater catchment systems
- Compatible with flat or sloped roofs
- Resists grease
- Proven history of performance
- Long-lasting protection
- Guaranteed, Limited Lifetime Material Warranty
- Labor and material warranty available to qualified applicators when applied in accordance with KARNAK system application specifications
- Code approvals
- Helps save energy

THE SEAL OF QUALITY

**Don't Re-Roof...Restore, with 670HS Karna-Sil™ Ultra.**

## 670HS Karna-Sil™ Ultra

### The Environmentally Intelligent & Economical Choice for Renewing Your Weathered Roof

#### Avoid Time-Consuming & Costly Tear Off Process

Rather than tear off and re-roof, restore your aged and leaking roof, save on labor and material disposal costs. Recover your roof while conducting ongoing business operations.

#### Extend Roof Life

Prevent future failures by restoring your roof. Advanced silicone engineered technology delivers a seamless, monolithic weather resistant seal that permanently protects the roof from extreme weather and harmful UV Light from degrading the roof system.

- Resists ponding water
- Withstands extreme climate and temperature conditions
- Superior stability and durability
- Excellent adhesion to roof substrates
- Excellent solvent and chemical resistance

#### Versatility

Ideal for almost any roof type (primer may be necessary). Compatible for restoration of these roof substrates:

- Existing elastomeric roof coatings
- Metal roofs
- Smooth BUR - Built Up Roofing
- SBS and APP membranes
- Aged Single Ply membranes - EPDM, TPO, PVC, Hypalon
- Recoat existing SPF
- Concrete and wood

#### Restoration & Preservation

All things considered, restoring the roof is the most environmentally responsible option. Coatings preserve your roof and the environment with far less waste in landfills. The high reflectivity of the coating reduces building energy consumption costs by keeping building temperatures cooler.

#### Leadership

KARNAK is an industry leader in innovative roofing and waterproofing solutions for a variety of commercial, industrial and residential applications.

#### Proven Performance Never Goes Out of Style

Founded in 1933, the company is still family owned and operated today with a continued commitment to new product innovation, dedication to environmental stewardship and service excellence.

#### Contact Us

KARNAK ENERGY STAR®-labeled coatings can help buildings obtain points towards LEED Certification.
